

## The SCIENCE of CARE

To us, caring is natural. It is life giving – and life changing.

That's why caring has always guided everything we do at Medela. As a family company, you could even say it's in our DNA.

Over the last 60 years, our company has been devoted to the science of making the most delicate form of care simple, intuitive and effective.

For those receiving care as well as those providing it.

Our team is passionate about our commitment to Swiss quality and service, because we know that this is how trust is earned.

We understand the needs of moms and babies, patients and the professionals who dedicate themselves to their care.

By advancing research and gaining deep insight of natural behavior, we develop forward-thinking innovation to nurture life for generations.

We care about the world around us and commit ourselves to advocacy, sustainability and you, to build a legacy that we all can be proud of.

Across the different stages of life, our products go beyond form and function. They heal, nurture health and build bonds.

Building better outcomes through equal parts physics, compassion, engineering and humanity.

Because we realized early on that the first step in caring is understanding.

And we've been caring for moms and babies, patients and healthcare professionals for so long, we've turned it into a science.
